

# User Guide

Once you install the plugin:

## 1. Inside Settings -> WP SEO Complete

-- there's the option to make all post titles as H1 tags in case your WP theme doesn't do it by default

-- there's the option to add nofollow to all outbound links in case your WP theme doesn't do it by default

## 2. Inside Settings -> WP SEO Complete -> Google Author Link

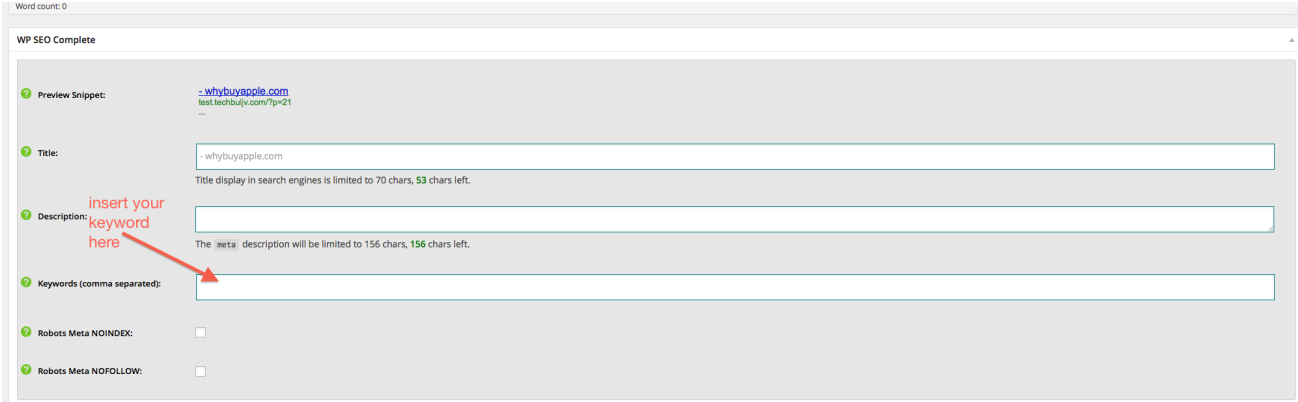

-- it's possible to add and customize Google Authorship by just a few clicks, compared to the nightmare of setting it up manually

## 3. On every new post/page

-- Right below the page is the option to add title, description and keywords

-- Once you insert ONE keyword and update the post, the scoreboard will appear on the right hand side:

-- Clicking the LSI link will show top relevant LSI keywords to insert into your post

The screenshot shows the 'WP SEO Complete' interface. It features a 'Preview Snippet' section with a URL: [-whybuyapple.com/leasttechbuyiv.com/?p=21](http://-whybuyapple.com/leasttechbuyiv.com/?p=21). Below this are input fields for 'Title', 'Description', and 'Keywords (comma separated)'. The 'Title' field contains '-whybuyapple.com' and has a note: 'Title display in search engines is limited to 70 chars, 53 chars left.' The 'Description' field is empty and has a note: 'The meta description will be limited to 156 chars, 156 chars left.' The 'Keywords' field is empty. There are also checkboxes for 'Robots Meta NOINDEX:' and 'Robots Meta NOFOLLOW:'. A red arrow points to the 'Keywords' field with the text 'insert your keyword here'.

Visual Text

Once the keyword is inserted, update your post

Press the LSI link and you get LSI suggestions
